

# How to Create a Cake in a Can

1 cake mix makes 5 cakes

Start with a 15 ounce pop top can.

Turn can over leaving the pop top intact. Use a can opener and open the bottom.

Remove contents, clean and dry.

Preheat oven to 350°

Make cake batter according to package directions.

Spray can with non stick cooking spray. Fill cans half way.

Bake 30 minutes or until a toothpick inserted into the center comes out clean.

Cool completely, run a knife around the edges, turn upside down to release cake. Clean cans.

Turn can upside down so that the pop top is on the counter. To the bottom (top) of the can, add any sprinkles or topper. Pipe in some of your favorite frosting or store bought. Add cake back to the can making sure the top of the cake goes in first.

Replace the bottom of the can that was taken off with the can opener. Use packing tape to adhere the bottom back on the the can. Tape on the printable.
